**Subject:** Microsoft Settlement

Honorable Judge Kollar-Kotally,

As an employee in the high tech industry, I am aware that Microsoft has used its operating system monopoly to dominate other software markets as well. In fact, every court has concluded that Microsoft violated antitrust laws in this manner.

The proposed final judgment does nothing to prevent Microsoft from continuing in this behavior and would amount to a government mandate of the monopoly. Furthermore, the many billions of dollars Microsoft earned illegally from its antitrust violations go untouched. Virtually no penalty is applied.

Due to these serious flaws in the proposed U.S. vs. Microsoft settlement, I ask you to reject it.

Sincerely,

Chris Chaves
